JUNIOR DATA ANALYST

SUMMARY

Junior Data Analyst with experience in cleaning, analyzing, and visualizing data, skilled at working with large amounts of data, identifying patterns and trends. Proficient in Google Sheets, SQL, Python, Tableau, and Looker Studio. I am looking for an opportunity to apply my knowledge, help businesses make data-driven decisions, and develop my analytical skills.

HARD SKILLS

- Python
- SQL (PostgreSQL, MySQL)
- Statistical Analysis
- Product Analysis
- Data Visualisation

TOOLS

- Pandas, NumPy
- DBeaver
- BigQuery
- Google Sheets
- Data Visualization Tools (Tableau, Looker Studio)

PROJECT EXPERIENCE

Order Delivery Time Analysis and Visualization

Tools: Tableau, Google Sheets

Description: Developed an interactive dashboard showing average delivery time by location and ship mode, with order distribution by delivery days; implemented filters by product segment, time period, and delivery class.

My tasks: Data processing and visualization, Delivery time analysis.

Result: Indicated that the delivery time varies from 0 (same-day) to 7 days; the majority of orders take ~5 days with standard shipping, regardless of product segment. One region shows significantly longer average delivery time.

Revenue Metrics in SaaS

Tools: Tableau, Google Sheets

Description: Built a dashboard displaying revenue metrics by location and product type, time dynamics, and distribution of revenue per user, with filters by date, location, and product.

My tasks: Data processing and visualization, Revenue analysis for a product company, including breakdown by location, product type, and user-level distribution.

Result: Identified that the majority of revenue initially came from the USA, with APAC's share growing over time and reaching parity; in each region, the majority of revenue came from different software. Revenue per user: median \$85, IQR \$35–\$190.

WORK EXPERIENCE

Keymavr Data Labeling | Nov 2024–Now

Data Annotator

- Performed labeling of images and videos on various projects on the Keylabs platform and client platform.
- Verified files from other annotators.
- Filled out working documentation and made video recordings of the work for the client.

Achievements: Received the highest category three times for speed and accuracy in work.

Glovo | Dec 2019–Oct 2023

Courier

ABM Technology | Apr 2023–Jun 2023

Laboratory Engineer

EDUCATION

IT School "GoIT" | 2025

Data Analysis

Ukrainian State Chemical Technology University | 2015–2021

Master's degree in Biotechnology and bioengineering
